CONTRACT SERVICES LTD

Minor Civils

Minor Civils

Minor civils sustain production, welfare and site operability by maintaining and upgrading infrastructure. They also lay the foundations for expansion – both literally, and for your business as a whole.

The Powertherm team brings a wealth of experience and expertise in the field of minor civils, as part of our extensive site services offering. From surveys and scanning to excavation and repair, we offer the widest range of specialist support solutions to suit your every requirement.

Our diverse range of minor civils include:

- › Building works: brickwork, joinery, dry lining, plastering & tiling
- › Formwork and reinforced concrete structures including construction of concrete plinths, supports and foundations
- › Bund repairs and linings
- › Concrete repairs
- › Tarmacadam: road / car park resurfacing & pothole repairs
- › Excavations
- › Underground duct laying for electrical and data systems
- › Drainage maintenance and repairs
- › Paving and landscaping
- › Surveys and scanning
- › Roofing, sheeting, and cladding
- › Fencing - new install and maintenance

Essential Support

We offer solutions for the full life cycle of your projects and operations.

If not considered, services such as drainage maintenance, concrete repair and tarmacking for pothole restoration could cause unexpected delays for your project or bring your processes to a halt, both of which will be costly.

Having minor civils solutions within our capabilities means we are on hand to fix the minor issues before they become major problems.
